

Assignment 4

Assignment date	25 october 2022
Student name	SHIRLY N
Student roll no	211419104250
Maximum Marks	2 Marks

Question 1:

Pull an image from docker hub and run it on docker playground.

Solution 1:

```
docker pull uifd/ui-for-docker
```

```
docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock uifd/ui-for-docker
```

The screenshot shows the Docker Hub page for the repository `uifd/ui-for-docker`. The page header includes a security advisory for Critical OpenSSL Vulnerability. The repository is owned by `uifd` and was updated 6 years ago. It is described as a web interface for Docker, formerly known as DockerUI, and is deprecated, with users advised to use Portainer for new features. The page shows the repository has over 10 million pulls. The 'Overview' tab is selected, displaying a message that the repo is deprecated and development continues at `portainer/portainer`. A 'chat on gitter' link is provided. A description states: 'UI For Docker is a web interface for the Docker Remote API. The goal is to provide a pure client side implementation so it is effortless to connect and manage docker.' On the right, the 'Docker Pull Command' is shown as `docker pull uifd/ui-for-docker`. The Windows taskbar at the bottom shows the time as 21:21 on 04-11-2022.

Docker playground:

The screenshot shows the Docker Playground interface in a web browser. The URL is `labs.play-with-docker.com/p/cdijgm3tccg00a7r71g#cdijgm3_cdihlm3tccg00a7r74g`. The interface includes a sidebar with a clock showing 03:45:22, a 'CLOSE SESSION' button, and an 'Instances' section with a '+ ADD NEW INSTANCE' button. The main area displays the instance details for 'cdijgm3_cdihlm3tccg00a7r74g', including its IP (192.168.0.18), memory usage (1.63%), CPU usage (0.51%), and an SSH command. Below this is a terminal window showing a series of Docker commands and their outputs, including pulling the 'uifd/ui-for-docker' image and running a container named 'serene_keller'.

```

```

Docker UI:

The screenshot shows the Docker UI interface in a web browser. The URL is `ip172-18-0-40-cdi0ji60qau0008f9u80-9000.direct.labs.play-with-docker.com/#/`. The interface includes a navigation bar with tabs for 'Dashboard', 'Containers', 'Containers Network', 'Images', 'Networks', 'Volumes', and 'Info'. The 'Containers' tab is selected, showing a 'Running Containers' section with a list of containers (one named 'serene_keller' is shown) and a 'Status' section with a donut chart showing the distribution of container states (Running, Stopped, Ghost). Below these are two line graphs: 'Containers created' and 'Images created', both showing a count of 1 over time.

Question 2:

Create a docker file for the job portal app or hello world app and deploy it in docker desktop app.

Solution 2:

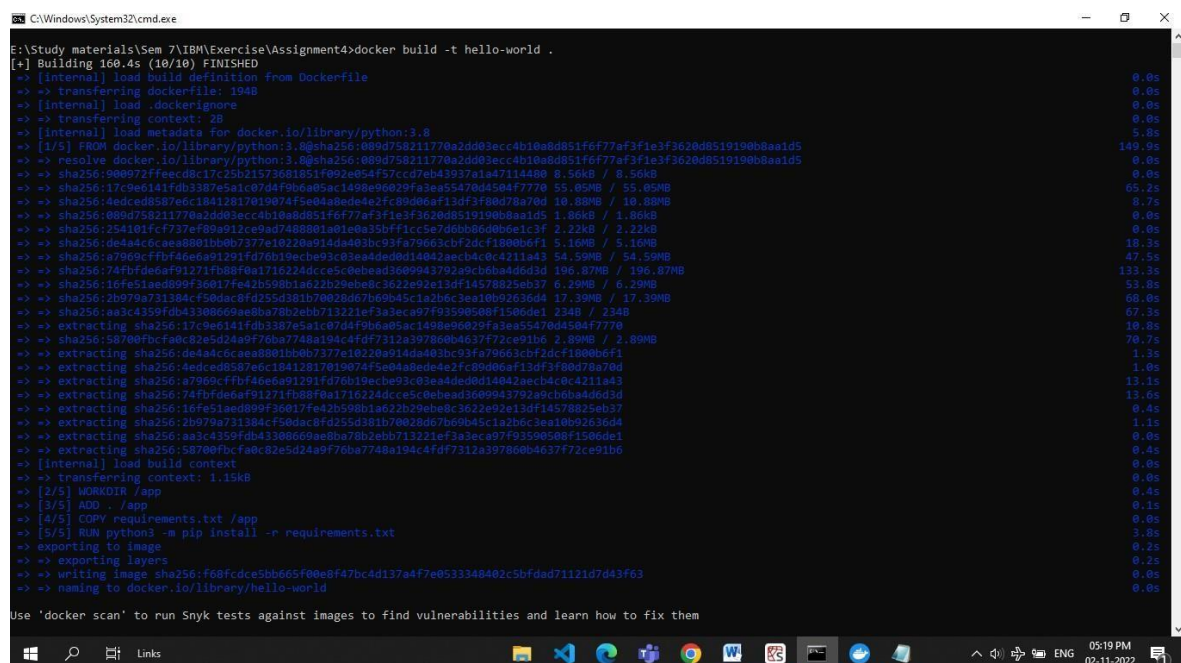

DockerFile

Dockerfile - Notepad

File Edit Format View Help

```
FROM python:3.8
WORKDIR /app
ADD . /app
COPY requirements.txt /app
RUN python3 -m pip install -r requirements.txt
EXPOSE 5000
CMD ["python", "app.py"]
```

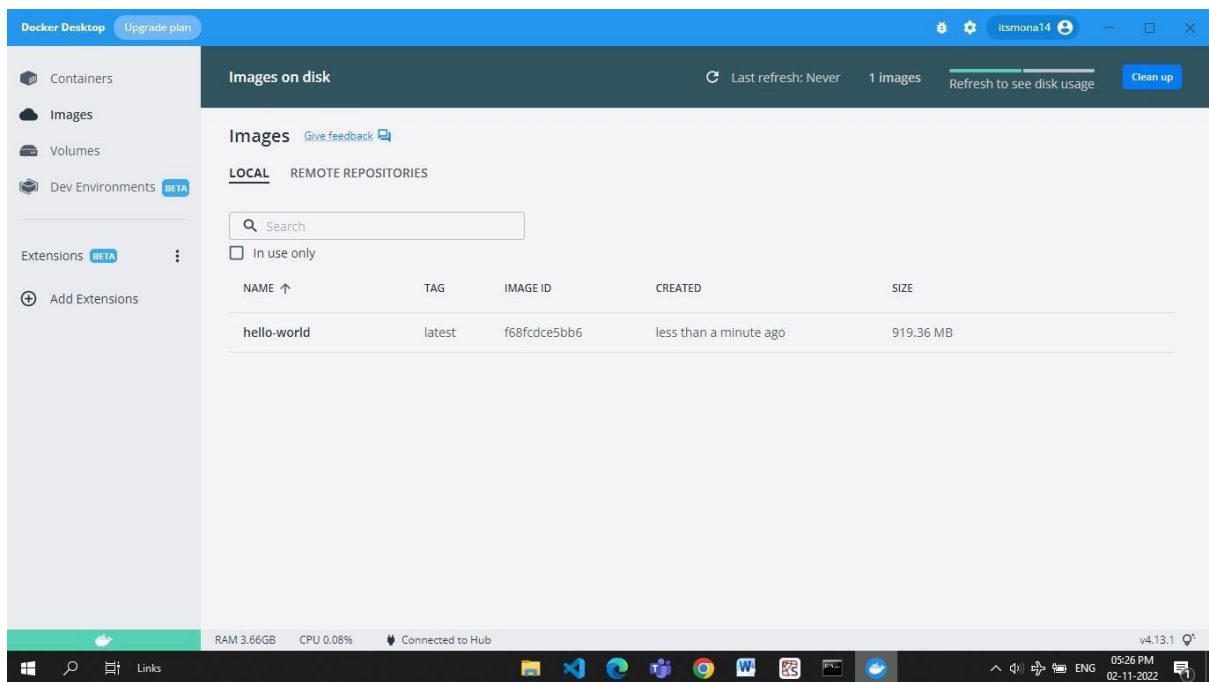

Bulid Docker image

```
C:\Windows\System32\cmd.exe

E:\Study materials\Sem 7\IBM\Exercise\Assignment4>docker build -t hello-world .

Question 4:

Create a kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodeport.

Solution 4:

<https://raw.githubusercontent.com/itsmona14/IBM-Assignment-cloud/main/deployment.yaml>

```
apiVersion: v1
kind: Service
metadata:
  name: hello-world-deployment
spec:
  ports:
    - port: 5000
      targetPort: 5000
  selector:
    app: hello-world
---
apiVersion: apps/v1
kind: Deployment
metadata:
  name: hello-world-deployment
spec:
  replicas: 1
  selector:
    matchLabels:
      app: hello-world
  template:
    metadata:
      labels:
        app: hello-world
    spec:
      containers:
        - name: hello-world
          image: au.icr.io/hello-world-app/hello-world
          imagePullPolicy: Always
          ports:
            - containerPort: 5000
```
